

Managed Security Service

SOLUTION BRIEF

Corserva provides a simple solution to the complicated problem of defending against attack. With Corserva's Managed Security Service, we keep a vigilant eye on all aspects of your IT infrastructure, whether on-premise or in the cloud.

You get the protection you need within an all-inclusive monthly fee. Corserva's Managed Security Service uses virtual sensors to monitor on-premise physical and virtual infrastructures, and cloud sensors and plugins to monitor your cloud environments.

Through continuous updates from the AlienVault Labs Security Research Team, we use the latest security intelligence to analyze against network data.

Once implemented, we log and alert on events 24x7x365, while meeting all defined Service Level Agreements for contracted incident response.

BENEFITS

- ✓ Detect emerging threats across your environment
- ✓ Respond quickly to incidents and conduct thorough investigations
- ✓ Measure, manage, and report on compliance (PCI, HIPAA, ISO, and more)
- ✓ Optimize your existing security investments and reduce risk

5 SECURITY ESSENTIALS IN ONE SOLUTION

#1 Asset Discovery

Know who and what is connected to your environment at all times

#2 Intrusion Detection

Be alerted to suspicious activities with host-based, network-based, and cloud-based intrusion detection systems

#3 Behavioral Monitoring

Learn of anomalous or suspicious behaviors in your environment

#4 SIEM & Log Management

Meet compliance requirements by correlating, analyzing, and reporting on event data from across your environment

#5 Vulnerability Assessment

Remediate your vulnerabilities before an exploit or intrusion

FEATURES

- Zero hardware, zero maintenance
- Supported by Corserva's cybersecurity experts with certifications including CISSP, CISM, CGEIT, CRISC, CEH, and CompTIA Security+
- Subscription tiers to fit any environment
- Highly extensible with several third party integrations including Cisco Umbrella, Fortinet, Palo Alto Networks, and more
